- **Moveworks and Integrations** (basic to mid level)
- **HAM & SAM** (basics)

PROFESSIONAL EXPERIENCE

Consultant – C2 | Cprime

Hyderabad, India · July 2020 – Present

Technical Role

- Designed and implemented ServiceNow solutions across ITSM, IRM/GRC, SecOps, Major Incident Management, Strategic Portfolio Management, Service Catalog and Case Management.
- Configured Incident, Problem, Change, Request, Knowledge and Major Incident Management processes based on client requirements.
- Implemented Policy and Compliance Management, Risk Management, Audit Management and Business Continuity Management processes to improve governance, risk visibility and compliance tracking.
- Configured Security Incident Response and Vulnerability Response capabilities to support security operations and remediation workflows.
- TPRM/IRM Solution: Explained how third-party risks connect with enterprise risks, controls, issues and remediation.
- Automated idea, demand and project creation processes within Strategic Portfolio Management.
- Developed ServiceNow solutions using Business Rules, Script Includes, Client Scripts, UI Policies, Flow Designer and scheduled jobs.
- Designed integrations using REST APIs, Scripted REST APIs, REST Messages, OAuth 2.0 and JSON payloads.
- Integrated ServiceNow with Jira, Confluence and digital engineering applications for access provisioning and fulfilment, UCF Integration for controls, LDAP integration.
- Enhanced scheduled integrations to create, update and deactivate ServiceNow records based on source-system data. Configured failure handling using response validation, error logging and operational monitoring.
- Designed Service Catalog forms, record producers, variable sets, dynamic field behaviour, approval workflows and task automation.
- Used fix scripts and background scripts to troubleshoot data issues and backfill historical records.
- Evaluated and configured Predictive Intelligence, Now Assist and AI-agent use cases, mostly OOTB and a few custom.
- Built dashboards and reports covering service-desk performance, incident trends, SLA compliance, risks and compliance status.

Functional Role

- Led client workshops, requirement-gathering sessions, solution walkthroughs, demonstrations and knowledge-transfer sessions.
- Prepared functional requirements, technical designs, integration documentation, payload mappings, test cases and deployment documentation.
- Performed unit, system, regression and user-acceptance testing and supported defect resolution.
- Collaborated with architects, developers, business stakeholders and integration teams throughout the implementation lifecycle.
- Provided post-production support, root-cause analysis and continuous improvements following go-live.
- Mentored team members and reviewed ServiceNow configurations and technical solutions.

Associate Consultant – C1 | Cprime

- Configured and enhanced ServiceNow ITSM and Service Catalog solutions.
- Converted business requirements into functional and technical configurations.
- Developed workflows, scripts, reports and dashboards.
- Supported testing, deployment, defect resolution and production activities.
- Collaborated with client business and technical teams to deliver platform enhancements.

Lead Internal Compliance Manager – Annual SOC 2 Type II Certification

- Directed the internal end-to-end audit lifecycle, coordinating across engineering, operations and leadership to validate policies, risks, incidents and annual control meetings.
- Facilitated external auditor engagements, providing fully validated control evidence and checklists that resulted in seamless SOC 2 Type II renewal/certification.

SPEAKING ENGAGEMENTS

Conference Speaker | Knowledge 2025

- **Session:** Integrating Security Incident Response with Unified Compliance Framework (UCF).
- Delivered an expert-level technical presentation on seamlessly integrating Security Incident Response workflows with the Unified Compliance Framework (UCF) to streamline governance and automated response.
- **Client Engagement & Enablement:** Led onsite workshops, requirement gathering sessions, and customer tool enablement and solution architecture with business objectives.
